The Socialists of Mil-waukee in 0 months have done were sold 32 tickets. Everybody more than the two old parties in thirty years. The American peo-ple want the right thing and they are not going to quibble over party names when it comes to a sbowdown, and a showdown is coming." Indian Corn or Maize.

Corn was found in our country where Indians used to live, and a white man saw the Indians plant the corn, and the white man asked the Indians for some of it, and the Indians gave him some dy for coughs, colds, lagrippe, asthof the corn, and that's why we ma, croup, hemorrhages, whooping call it Indian corn. First we cough or weak lungs. 50c, \$1.00. Triplow the land, and then we plant the corn, then it comes up. We plant it in February or March. It is a commercial crop in other countries. When it is large and green, and then you thin it, Then you plow it again. When the rosen cars are large enough we eat the rosen ears and can it. Then we cut the tops and when they are dry enough you tie them and carry them on piles so you don't drive over all the corn. When it rains on the tops it gets sandy and the cattle don't like it as well as they like the other and then you leave the corn till in Cctover, and then you gather it, and sell some of it, and keep the rest for your horses, chickens and other animals, and bring some of it into the mill, and they grind it for you, and we make corn bread and corn flakes. When you get ready to plant corn you don't take it out of the crib. Maybe you will get a large car. But it is the only good ear around it, and that isn't but an earth stealer and it takes all of your trouble and work and is stealing your land. So it is best to go into a field and see that you get a good sounding ear and large and see that they are good stalks around it with good ears. When you want corn to plant you only 帝副诗, 杨祖哲
